

Lees Ferry – citizen science fish lengths

Start of the day Fill out the top of the datasheet.

While Fishing

As you catch fish, measure total length (from the snout to the tip of the tail, pinch the tail lobes together to make the fish as long as possible) of each fish **to the nearest inch**.

For rainbow trout, there are boxes for fish length - record a tally mark to count each fish.

For other species, write down the species and length in the other fish section.

Record lengths of **all fish caught**, no matter the length or species.

End of Day Record your end time.

Submit Data

Option 1) Take photo of completed datasheet, send to Dale Fonken:
email: dfonken@azfd.gov
or text: 503-730-9424

Option 2) mail datasheet to: AGFD
506 N. Grant St, Suite L
Flagstaff, AZ 86004

Thank you! Arizona Game and Fish will use these measurements to better understand the fishery!
